Corporate Safety Specialist, Framingham, MA

Staples, Inc.

Reference # 41638BR

JOB SUMMARY:

Responsible for establishing corporate wide safety, health, and loss control policies and procedures which serve to reduce accidental loss, control the cost of risk and ensure local, state and federal regulatory compliance. This position develops and maintains cross functional partnerships with all levels of management at the corporate and Staples Business Unit (SBU) levels to achieve the proper "buy-in" and execution of the overall program. The Corporate Safety Specialist position serves as the corporate subject matter expert on all safety, occupational health and regulatory matters and is responsible for providing functional direction, guidance and training to the field operators as appropriate. Successful implementation and execution of the program is achieved through a team based approach. This position works under the assistant risk manager but has decision making responsibilities as it relates to occupational safety and health matters. Establish a sustainable safety culture that proactively addresses injury and regulatory exposures across all areas of the business.

- · Strengthen SBU support by demonstrating and communicating the value of safety to the bottom line of the business.
- · Establish and communicate / report on key performance metrics to focus efforts and resources most effectively and drive accountability to results.
- · Contribute directly to the safety initiatives and efforts of the SBU by routinely participating at leadership conferences, conference calls, business unit committee meetings, etc.
- · Provide frequent analysis and feedback on program execution, accident trends and status of current initiatives
- · Integrate safety into existing processes and operations to address accidental losses before they occur; e.g., promotional fixture reviews, etc.
- · Develop and implement tactical and pragmatic solutions to known hazards and loss exposures. Equip the field operators with the knowledge and tools to operate an effective occupational safety and health program.
- · Design, evaluate and manage all company safety programs; e.g., Hazardous Communications, Bloodborne Pathogens, Power Industrial Truck Training and Certification, Fall Prevention, etc.
- · Conduct detailed data analysis on large volumes of loss data at least quarterly to identify accident trends, root causes and process improvement opportunities.
- · Design and coordinate training, awareness and incentive programs targeted at reducing the leading causes of accidents and other losses.
- · Design auditing tools for field execution and oversight of key injury and regulatory areas.
- · Conduct comprehensive job hazard assessments of workplace tasks, processes and operations.
- · Investigate, respond and manage all federal, state and local regulatory matters related to occupational safety and health; e.g., OSHA, EPA, DOL, etc.)
- · Provide education and awareness to critical field personnel on how to proactively identify and communicate regulatory issues.
- · Leverage field operational teams to effectively manage regulatory inquiries.
- · Work directly with the worksite on hazard abatement strategies.
- · Coordinate all company responses to regulatory matters to ensure the most favorable outcome.
- · Negotiate settlement agreements to ensure all regulatory matters are resolved amicably.
- · Communicate regulatory experiences company wide to control and prevent future loss exposures.

Partner with the claims position(s) to achieve an integrated and seamless transition between pre-loss and post loss programs and expectations. Work collaboratively on reporting procedures, injury management programs and general field training and awareness initiatives. Contribute and support the monthly administration of the company wide Work. Comp. chargeback program.

QUALIFICATIONS:

- Bachelor Degree Required
- 2 to 4 years related work experience
- Communication - Strong written and verbal communication and negotiating skills.
- Analysis - Be able to analyze problems and issues effectively.
- Knowledge - Fundamental understanding of OSHA regulatory matters for general industry.
- Computer Literacy – proficiency with Microsoft Office products and experience with insurance / third party administrator (TPA) data bases.
- Decision Making – Use appropriate knowledge, insight and expertise in making sound decisions.
