Safety, Health and Environmental Job Openings (June 29, 2011)

www.psassociatesinc.com

Following is a list of some of the available job openings in the Environmental, Health and Safety area that I am working on. Should you know of anyone that might be interested

in learning more about these positions please have them contact me, Paul Shrenker, directly or feel free to contact me yourself and I will give you more details. My phone number is 413-267-4271; email address, paul@psassociatesinc.com and fax 413-267-4287. All searches and candidate conversations are held in strictest confidence and no resume will be mass distributed. Thanks for your help.

Director EHS (South AR) for two manufacturing sites of this company consisting of approximately 400 employees; both union and non-union facilities. This person will report to the Plant Manager at the Arkansas site and have 8 direct reports. This person should have 5+ years ehs experience from a manufacturing environment to include PSM and energetic materials and supervisory experience. The bulk of this employee's time will be spent on safety (75%) with the remainder (25%) focusing on environmental matters. BS required and a Master degree would be a plus.

Regional Safety and Health Managers I and II (Phoenix AZ and Denver CO) for the service division of this \$37B global corporation. This person will lead the implementation of the Region's safety and health programs and processes specific to the Systems, Services and Solutions businesses at the Regional, Branch and project/site level where necessary. This person will work in their Western Region which includes MT, WY, CO, NM and everything west including AK and HI and the 3 western Canadian Provinces. The ideal candidate should have a BS in Safety or related and 10+ years experience (Manager I) or 15+ years experience (Manager II) in a manufacturing, construction or service setting including multi-site experience. Travel will be up to 60% but initially it will be as high as 80%.

Corporate Industrial Hygienist (Birmingham, AL area) for this heavy manufacturing company with 24 locations. Travel is expected to be about 40%. The ideal candidate must be certified (CIH) and have strength in ergonomics which will be the primary focus for 2011. Additional experience in noise control would be a plus. This will be more of a management role working with consultants and determining through company wide sampling results, potential risks and strategies to mitigate the risks. Relocation assistance provided.

Safety Manager (West Central IL) for this metal fabrication manufacturing facility in West Central IL. The facility has approximately 250 employees (union environment). This position reports to the Plant Manager and will have one direct report (Safety Engineer). The ideal candidate should have 5+ years safety experience from a manufacturing environment to include development and implementation of programs, strong leadership skills and a BS in Safety or related.

Safety Engineer (Quincy, IL area) for this 200+ employee manufacturing facility. This position reports to the Safety Manager and has no direct reports. The ideal candidate should have 1+ years of safety experience from a manufacturing environment and a BS in Safety or related.

Safety Manager (Bloomington, IN area) for this metal fabrication manufacturing facility in Southern IN. This person reports to the Plant Manager. The ideal person will have 5+ years safety experience out of a manufacturing environment, a BS in Safety or related and good leadership skills. There are no direct reports to this position.

Several positions that I can not post include: Safety Engineer, FL; EHS Supervisor, MO; Safety Manager, IA; Environmental Engineer, SC; PSM Engineer, AL; Safety Professional, MN; Corporate IH, KS; Environmental Engineer, KS;

Positions are added weekly. If you or someone you know would like to be informed of future job opportunities as they become available, please forward their name and email address to paul@psassociatesinc.com.

VP, Safety – Construction, Northern CT

I have a client who has hired me to find them a Safety Director. This is a VP level position within the firm and they are looking for 10+ years of experience in an upper level safety position. The person is required to have worked for a self-performing contractor. The chosen candidate will be redoing policies and inspections, a lot of OSHA and will supervise another individual.

This is an excellent opportunity to work for a busy firm in a key position with a lot of job security.

Safety Engineer, North Central Connecticut

Client north of Hartford, CT is looking for a full time Safety Engineer, 65-80K range depending on experience. This is a non-union manufacturing facility reporting directly to HR Manager and only responsible for Safety. You would be the only Safety person at this location and must be very hands-on as needed.

5+ Yrs of Safety Engineering.

Must have experience with managing a Safety Program for manufacturing facility. Most of the Safety Programs are well established but must be able to improve current programs, while keeping updated with new regulations, and creating some new programs.

Should have experience with ergonomics.

Coming out of a Lean Environment will be very beneficial.

OHSA audit experience is a HUGE plus.

Should have experience with conducting training for safety with ALL levels of employees.

Bachelors Degree REQUIRED (Engineering disciplines preferred)
