### **Health & Safety Compliance Consultant, Hartford, CT**

ERM is seeking a Health & Safety Compliance Consultant to join our growing Performance & Assurance practice team in Hartford, CT. In this role, you will provide project management and technical assistance on health and safety compliance projects, safety management systems, safety oversight, industrial hygiene monitoring, and compliance assurance programs for clients locally, nationally, and internationally. In addition, the successful candidate will serve as the Northeast District H&S Coordinator and will be responsible for facilitation of ERM's internal H&S program within the district. This is an excellent career opportunity to work with an expert consulting team on challenging EHS management projects for large industrial and global clients. Access to ERM's national Performance & Assurance experts provide knowledge sharing of best practices across the industry and ongoing learning opportunities for our team.

#### RESPONSIBILITIES:

- Facilitate ERM's internal H&S program within the Northeast district.
- Provide technical assistance on safety-related compliance projects, safety management system development and implementation, safety oversight, industrial hygiene monitoring, and safety auditing.
- Develop safety procedures, plans, permits, and reports.
- Assess regulatory compliance across various safety programs and environmental media.
- Perform compliance audits and implement follow-up corrective actions to ensure compliance with federal, state, and local regulations.
- Design and implement safety management systems and programs for clients.
- Conduct training, field coaching, and assessment for safety performance improvement projects.
- Provide on-site EHS compliance support at client facilities.
- Manage multiple projects within scope/budget/schedule expectations and ensure quality standards on project deliverables.
- Support ERM Partners-in-Charge and other Project Managers to effectively manage and deliver projects.
- Effectively steward and build client relationships leading to repeat business.
- Build strong collaborative relationships with other ERM employees.

#### REQUIREMENTS:

- Bachelors or Master's Degree in safety, engineering, or related discipline.
- Minimum 5 to 10 years of health & safety field experience in industrial environments. Oil & gas, industrial, or chemical sector experience desired.
- Strong knowledge of OSHA General Industry and/or Construction standards.
- Certification in field: CSP, CIH, or similar registration highly desirable.
- Experience implementing/maintaining/auditing corporate management standards (either as a consultant or an internal compliance officer). Expertise in international management systems (OHSAS 18001/ ISO 14001) a plus.
- Demonstrated ability to provide detailed regulatory interpretation of federal and state OSHA regulations.
- Excellent communication, interpersonal, MS Office computer, and analytical skills; experienced in writing comprehensive technical reports/documents.
- Ability to multi-task, maintain flexibility, travel, and work independently with minimal supervision.
- Auditing experience preferred.

TO APPLY:

To apply, please click (or cut and paste) on the following link:

<http://tbe.taleo.net/NA9/ats/careers/requisition.jsp?org=ERMGINC&cws=1&rid=5811>

Please submit your resume and brief cover letter. Qualified candidates will be contacted by email, and requested to complete a pre-interview questionnaire. Based on review of these responses, shortlisted candidates will be invited for interviews. Thank you for your interest in ERM!

ERM is the world's leading provider of environmental, health and safety, risk and social consulting services. We have over 140 offices in 40 countries and employ around 4,000 professionals, providing the best global platform in the industry. For more than 30 years, we have been delivering innovative solutions to leading business and government clients, to help them manage environmental risks and challenges within their organizations. In doing so, we have become one of the world's largest and most successful environmental consulting firms offering a range of compliance assurance, impact assessment planning, site investigation and remediation, and corporate advisory services.

Our people are outstanding, our workplace is energized! And we continuously strive to be the preferred place for environmental and other professionals to build meaningful and rewarding careers.

**Safety Director, Boston Area, Massachusetts**

Demoulas Super Markets, Inc. is accepting resumes for the position of Safety Director.

The Safety Director will oversee a department that supports a fast-paced retail store and distribution center environment with the expertise necessary for the execution of world class safety measures. The Safety Director will lead a department in providing the skill set necessary to develop and implement best safety practices consistent with management's safety and compliance objectives.

The macro requirements of this position are the ability to utilize a superior strategic thought process, and to possess the management skills necessary to achieve measurable success throughout multiple levels of management.

The position of Safety Director requires communication with personal visits to, and the provision of oversight in, distribution centers, and other facilities controlled by Demoulas Super Markets, Inc.

Responsibilities:

- Maintain OSHA compliance.
- Achieve management's safety objectives.
- Record keeping.
- Trend analysis.
- Maintain and continually improve existing Safety Program.
- Maintain and enhance associates' safety awareness.
- Maintain familiarity with regulations as they affect all Demoulas and Market Basket facilities.
- Accident investigation.
- Develop appropriate responses and Corrective/Preventive Actions.
- Communication with corporate management as well as operational management and associates at all levels of the Demoulas Super Markets organization.
- Liaise between regulatory and company officials.
- Provide technical support to safety committees.
- Respond to accidents/safety emergencies.
- Serve in an advisory role to directors of operational divisions as they develop new processes and equipment needs.
- Serve as a liaison between contractors, equipment suppliers and buyers or directors of operational divisions.

The successful candidate will be able to meet the following requirements.

- Thorough understanding of 29 CFR 1910.

- Knowledge of retail and distribution center risk assessment including risk severity matrices, risk mitigation and management.
- Understand planning for hazard identification, risk assessment and control in a fast paced retail environment.
- Five to ten years experience managing risk to reduce accidents; complying with applicable state and federal regulations; and continual improvement of safety programs.
- Five to ten years experience interacting with OSHA representatives at state and federal levels, dealing with compliance issues.
- Knowledge of, and proven ability to, prepare effective action plans to address citations and audit findings.
- Five to ten years corporate management level food industry experience; current retail and compliance experience preferred.
- Experience with OSHA Voluntary Protection Programs.
- Developing safety best practices.
- Proven ability to administer existing safety programs in a retail environment. Food industry preferred.
- Proven track record of maintaining good standing with regulatory agencies and remaining in compliance with, or exceeding, applicable regulations, during, and while maintaining, the normal course of business operations.
- Demonstrated ability to analyze accident reports and implement preventive actions.
- Must be a technical expert skillful in problem solving and maintaining a positive image of the company.
- Must be analytical and have experience developing flexible resolutions compliant with regulatory requirements and conforming to unique conditions in the retail industry.
- Superior written and oral communication skills.

**Education Requirements**

- A 4 year degree in Occupational Safety or Engineering.
- Masters degree in Occupational Safety or Safety Engineering preferred.

If you are interested in applying for the position, please send a resume, with salary history to:

David McLean  
 875 East Street  
 Tewksbury, MA 01876

Demoulas Super Markets Inc. is an Equal Opportunity Employer. All applicants will receive consideration on their qualifications, and without regard to Age, Race, Color, National Origin, Religion, Marital Status, Handicap or Disability, Sex, Sexual Orientation, or Veterans' Status.

Project Manager - Emergency Preparedness, Portland, ME

Job ID: 919035

Location: Greater Portland

Facility: Maine Medical Center

Department: Emerg Preparedness

Std Hrs/Wk: 40

Shift: First Shift (Day)

Full/Part Time: Full time 36-40 hours (with benefits)

Job Details:

- Preferred skills:
  - Experience in interpreting and managing projects and initiatives related to The Joint Commission Hospital Emergency Management Standards.
  - Experience in the management of comprehensive hospital emergency management plans.
  - Expertise in developing, coordinating and executing large-scale hospital drills and exercises.
  - Experience with the development of hospital-wide emergency preparedness-related training programs
  - Expertise in developing, conducting and analyzing Hazard Vulnerability Analysis (HVA) in a variety of healthcare settings as well as developing related corrective action plans for deficient areas.

Position Summary

The Project Manager has primary responsibility for facilitating the planning, implementation and post implementation phases of various hospital emergency management related strategic projects for the department, Maine Medical Center and its affiliates. The Project Manager will determine the appropriate qualitative and quantitative measures to evaluate progress and successful implementation. These projects will result in measurable improvements that will impact clinical, administrative, financial systems, and/or the infrastructural systems of MMC and that will

benefit our patients, families and staff. The Project Manager will also provide regular progress reporting to his/her supervisor and other groups as appropriate.

**Required Minimum Knowledge, Skills, and Abilities**

1. Bachelor's degree in a related field. Master's preferred. Additional training in Hospital Incident Command System (HICS) and Certified Hospital Emergency Manager (CHEM) certification preferred.
2. Five+ years project management experience that is multidisciplinary in nature with documented success in hospital emergency management. The position may also require the incumbent have proven work experience related to the other specific area of focus (e.g. clinical process improvement and facilitation, patient safety, etc.).
3. A high level of interpersonal skills are necessary to support dynamic work teams and communicate effectively with a wide variety of patients/families, hospital administrative staff, clinicians and external contacts and vendors.
4. A high level of analytical and critical thinking skills are needed to assist in the development of new systems, policies, techniques, training programs, procedures and to develop special and recurring reports or analysis.
5. Excellent oral and written presentation skills; ability to write and present for a variety of audiences.
6. Demonstrated highly developed organizational skills.
7. May require highly developed negotiation skills.
8. Knowledgeable of computer programs needed for position.
