Health and Safety Specialist/Project Manager, Hartford, CT

We are EnSafe, an employee-owned, global professional services firm. We strive to provide cutting-edge, creative solutions for our clients. We are currently accepting applications for a Health and Safety Specialist/Project Manager. The position will be based out of our Hartford, CT and will serve as a consultant to our clients to ensure compliance with EPA, DOT, LOTO, and OSHA regulations. Our ideal candidate will conduct on-site safety inspections, industrial hygiene sampling, training, as well as other safety or industrial hygiene activities. We require a minimum of a BA or BS in a related field, one or more years' experience (prefer in a consulting environment), good written and verbal communication skills, and a strong work ethic. Appropriate safety or IH certifications are also preferred. Extensive overnight travel is required with this position.

Our employees are outgoing, self-motivated, and thrive in a fast-paced consulting environment. We offer a competitive salary and benefits, an outstanding work environment, and the opportunity to work on some really cool projects. For consideration, submit your cover letter, salary expectations, and resume to: resume@ensafe.com or fax to 901.248.6982

Check us out on the web at www.ensafe.com

Environmental Operations Manager, New Haven, CT

Environmental Affairs Section, Office of Environmental Health and Safety
Yale University

Yale University is looking for an Environmental Operations Manager. Join our progressive Office of Environmental Health and Safety at one of the world's premier universities. Yale provides generous benefits and strongly supports EHS. On the Long Island Sound, New Haven has outstanding arts, dining, theater and other culture, and is close to all the beauty of New England and the fun of New York City. Campus architecture is amazing.

Job Summary: Reporting to the Environmental Affairs Manager, the individual who fills this position will lead Yale's comprehensive program for the management of regulated waste (i.e., radioactive, chemical, biomedical, universal, mixed and multihazardous). Seven technicians report to this position. As a workgroup, they oversee the safe and

compliant generation, minimization, collection, transport, accumulation, storage, treatment and disposal of Yale's regulated waste. Yale's Environmental Operations Manager oversees five less-than-90 day storage facilities, four radioactive waste facilities and an on-site autoclave-shredder to treat biomedical waste. Yale holds radioactive waste for decay-in-storage, labpacks chemical waste and bulks waste solvents. For these activities, the workgroup is responsible for compliance with the various applicable laws as well as overall protection of health and the environment. This position is expected to create a supportive, productive, team-oriented work environment that provides excellent customer service. As a member of EHS' leadership team, the Environmental Operations Manager will promote collaboration within EHS as well as the campus community, to further our proactive and service-oriented relationships with students, faculty and staff. It is vital that the successful candidate have excellent interpersonal and communication skills.

Required Qualifications: Four or more years of progressively responsible regulatory hazardous waste program management experience at a research university, government research facility, medical research center or a similar research/higher education work environment. Bachelor's degree in a related scientific field (Master's degree preferred). Excellent writing, speaking, training and technical skills are required. Please apply. Salary range is \$75,000 to \$97,000. Relocation assistance is available.

Applications must be submitted on line via www.yale.edu/jobs (Refer to STARS Req ID 26880BR). For more information and the full description, please contact Stephanie Perry, Lead Administrator, Office of Environmental Health & Safety, Yale University, (203) 737-2122, stephanie.perry@yale.edu.

Yale University is an Affirmative Action, Equal Opportunity Employer. Yale values diversity in its faculty, staff, and students and strongly encourages applications from women and members of underrepresented minority groups.

Director/Equity Partner, Global Product Stewardship Services (Cincinnati, **Boston** or Chicago)

As part of the continued growth and innovation of our Performance & Assurance practice, ERM has an opportunity for an experienced Product Compliance and Stewardship leader to join our global consulting firm as a Partner, and become a true owner and shareholder in a business with Sustainability at its heart. The preferred locations for this position are Cincinnati, Boston, or Chicago; other major US cities where ERM has a presence may be considered.

We are looking for both established and emerging leaders who are interested in being part of this thriving global community – outstanding professionals who combine strong consulting and business development skills with a strong technical foundation – to foster and expand a network of excellent client relationships in the manufacturing, chemical, and oil & gas industries. We seek individuals to help us drive the continued growth of ERM’s business through selling and delivering world-class services, recruiting and developing our next generation of leaders, and further advancing our reputation for EHS sustainability solutions.

This is a Partner-level opportunity for a Principal/Director/VP-level professional looking to further their career with an equity stake in a global environmental leader that aims to lead the field in sustainability consulting. A career as an ERM Partner is unique. Our

partnership model offers unparalleled opportunities for leaders with ambition, vision and proven expertise, providing:

- The opportunity to contribute significantly to key decisions, including the overall strategic direction of our organization.
- Meaningful equity ownership with significant financial and intangible rewards.
- The ability to provide “thought leadership” on a wide range of technical and business issues impacting our core markets.
- An extension of ERM’s market position and reach with your established relationships to further drive our growth.

ERM’s Global Product Stewardship practice provides technical expertise, strategy, hands-on implementation support and innovative solutions to clients across a wide range of sectors, including manufacturing (both durable and consumer products), energy, chemical, pharmaceutical/health-care, and metals, just to name a few. This leadership position offers an excellent career opportunity for an individual with experience in product regulations and compliance (TSCA, FIFRA, FDA, OSHA HazCom, UN GHS, REACH, CLP, Biocides Directive, ROHS, and WEEE). This individual would ideally have knowledge of emerging market product regulations, industry product stewardship practices, and industry-applicable life cycle analysis.

ROLE PROFILE:

- Primary focus on client account development, sales, and delivery of the full spectrum of ERM’s consulting services to deliver strategic value to our clients in the manufacturing, chemical, and/or oil & gas sectors. In particular, play a key role in growing ERM’s Performance & Assurance practice as it pertains to product stewardship offerings.
- Actively develop commercial strategies to pursue and win new business opportunities that result in significant revenue growth with target clients aligned with ERM’s global strategy.
- Provide business value selling at the top levels of client organizations, raising the profile of ERM’s capabilities within key client organizations, to identify and shape clients’ needs for ERM services.
- Develop new client relationships and expand existing relationships by delivering strategic consulting advice, excellent value, and quality service.
- Maintain pulse on industry business cycles and prioritize sales efforts toward high-potential, top opportunities.
- Manage capture efforts utilizing technical understanding to develop proposals, including written content, pricing, presentations, and contracting.
- Contribute to leadership and management of major programs and projects to help clients proactively address their product stewardship risks and challenges.
- Lead consulting engagements in the areas of regulatory compliance and product stewardship for raw materials and products focused on where the products are sold as well as where they are manufactured. (This includes US, EU and other global chemical

management laws and regulations such as TSCA, FIFRA, FDA, OSHA HazCom, UN GHS, REACH, CLP, Biocides, ROHS, and WEEE.

- Facilitate and support clients in the evaluation of SDS, labels, and packaging requirements. Evaluate toxicology, environmental effects, exposure, regulatory compliance, product liability and product efficacy and performance.
- Assist clients in preparing chemical registration dossiers, PMNs and other regulatory submissions.
- Build, grow, and manage a high-performance team, serving as a leader and mentor to consultants. Identify emerging talent and work with them to reach their full potential; ensure rising stars are nurtured, developed and given new areas of responsibility.
- Support the growth and development of ERM's global Product Stewardship specialty within our Performance & Assurance practice and actively collaborate with colleagues across the globe. Drive innovation within the practice to stay ahead of client needs and to differentiate ERM in the market.
- Work in a collaborative, cross-functional team environment to build ERM's global business, as well as to lead client and practice teams.
- Meet business financial targets, overall project budget and schedule, client satisfaction/expectations, and internal and contract requirements.

QUALIFICATIONS:

- MS or Ph.D. in chemistry, toxicology ecotoxicology, risk assessment, regulatory affairs, hazard communications, or other relevant disciplines.
- 15+ years' progressive product-related experience in a consulting environment, working substantially with industrial clients; preferably with the oil & gas, chemical and/or manufacturing sectors.
- Demonstrated experience with US, EU and other global chemical management laws and regulations such as TSCA, FIFRA, FDA, OSHA HazCom, UN GHS, REACH, CLP, Biocides, ROHS, and WEEE, emerging market product regulation and registration, and industry product assurance and stewardship practices.
- In-depth understanding of the companies operating in core ERM sectors, including existing relationships that can be leveraged into new business.
- Business acumen to understand business risk and challenges, and recognize corporate opportunities.
- Demonstrable track record in delivering multimillion dollar sales results annually, including successfully winning large and strategic projects.
- Offer recognized technical expertise and an established reputation in the local marketplace.
- Certification in field; PE, CSP, DABT, CHMM, or similar registration desired.

TO APPLY:

Please submit your resume and brief cover letter. Thank you for your interest in ERM!

Environmental Resources Management (ERM) is a leading global provider of environmental, health, safety, risk, social consulting and sustainability related services. We have more than 5,000 people in over 40 countries working out of more than 150

offices. ERM is committed to providing a service that is consistent, professional and of the highest quality to create value for our clients. Over the past five years we have worked for more than 50 percent of the Global Fortune 500 delivering innovative solutions for business and selected government clients helping them understand and manage the sustainability challenges that the world is increasingly facing.
