Research Support Specialist III

New England Center for Emergency Preparedness (NECEP) Dartmouth Medical School
Hanover, NH This position provides direction for assigned state contract/program activities as the New England Center Emergency Preparedness' (NECEP) primary point-of-contact. To participate in projects for emergency preparedness and response with a focus on community-based, regional surge capacity; although, work in other topics may be assigned. This position will provide project/research support to the NECEP leadership. NECEP pursues a variety of contract and research projects related to surge capacity at the Local, State, and National levels. Projects involve organizational, policy, logistical, technical, social, and clinical aspects of providing health surge capacity, particularly for large-scale emergencies.

The mission of the New England Center for Emergency Preparedness (NECEP) is to improve emergency response in Northern New England by facilitating the coordination of all-hazards planning and response to mass casualty or other significant events. NECEP provides assistance to state, sub-state regional, and local governments and responders through development of training and education, assistance with planning guidance, and exercise design, evaluation, and after action. NECEP also serves as the coordinating agency for the Northern New England Metropolitan Medical Response System (NNE MMRS), allowing NECEP to garner federal resources in the domain of emergency planning, response, and recovery.

Description: Health and Safety Engineer

About the Company

Enel North America, Inc. (Enel NA) is a leading owner and operator of renewable energy projects in North America, with a presence in 20 U.S. states – operations in 17 and development in three - as well as three Canadian provinces. Based in Massachusetts, Enel NA has a uniquely diversified renewable energy portfolio, generating electric power from hydropower, wind, biomass, and geothermal. This dedication to a quadruple suite of renewable technologies sets Enel NA apart from other independent power producers.

The person in this position will work with our field, staff and management professionals as a resource in the application of health and safety principles to the production processes. They will provide consultative support to management and employees with the goal of creating and maintaining the company safety program, with specific focus on geothermal power plant operations. The Health and Safety Engineer will work from our geothermal power plant in Fallon, NV and report to the Safety Manager

About the Benefits

Among other benefits Enel North America offers medical dental and vision plans that take affect on your 30th day of employment; Company sponsored life insurance at 2X your annual salary; and an 80% match on your 401(k) up to 5% of your salary that vests immediately

Responsibilities:

- Assist management with implementation and maintenance of compliance plans, programs, and initiatives primarily at geothermal power plants
- Champions PSM program
- Investigates accidents, near misses and counsels employees involved in incidents to prevent reoccurrence.
- Conducts periodic inspections/observations to ensure compliance with company and regulatory standards
- Develops, conducts and coordinates safety training
- Trains and coaches management, safety committees and focus groups regarding health and safety observation/behavior skills
- Conduct routine safety observations to ensure compliance with regulatory agencies, company health and safety policies, and practices
- Coordinate safety initiatives and interface with contractors on large scale construction projects
- Investigate and take appropriate actions concerning employee requests, complaints and concerns involving unsafe conditions/practices
- Coordinate and monitor the selection, training, and use of PPE as needed
- Maintain site specific OSHA injury and illness record keeping
- Maintain the facility emergency action plan and provide training as needed
- Provide information and assist in the development of budget forecasts, schedules and associated cost information and labor allocations
- Maintain a positive rapport with various state and federal regulatory agencies
- Special Projects as Required

Requirements • BS in Health and Safety or related field

- Proficient in Microsoft Office
- Ability to be on call or work off hours as needed
- Availability for domestic and international travel; up to 30%
- 2-5 years experience in the health and safety field . Experience in the power generation or construction field a plus.
- Superior written and verbal communication skills

- Experience with OSHA , PSM , safety management systems/quality systems, or work with a process based production environment a plus
 - Experience in construction safety also a plus.
-

Senior Manager, Global EHST Audits
Schering Plough, Berkley Heights, NJ

Independently participate in or lead environmental, health, safety and transportation audits. As lead, plan and execute highest risk, most complex audits under minimal supervision; responsible for ensuring quality of work performed. As a team member, independently execute high risk elements of the audit. Has overall responsibility for drafting complete audit reports. Lead management / department briefings regarding audit observations. Lead audit closing meetings. Understand and communicate complex regulatory requirements to various audiences. Demonstrate expertise in assessing root cause analysis. Provide recommendations as well as guidance on a variety of complex business practice / compliance issues.

Assist in the development of the annual audit plan. Assist in the development of the department training plan; train and develop junior staff. Participate in or lead cross functional teams.

Significant impact on work group performance; drives work group results. Expected to understand subject matter areas outside of the audit unit or company.

Travel is approximately 25% or about 13 audits per year - combination of domestic and international.

Minimum Education / Experience Guidelines:

Bachelor's Degree and 8-10 years relevant experience; Advanced Degree and 7-9 years relevant experience; CPEA and other technical certifications (e.g. QEP, CSP or CIH) preferred at hiring; CPEA required within two years of hiring.

The position is located in Berkley Heights, NJ; no relocation is offered. The salary varies with experience.
